CRM AUTOMATION SPECIALIST | AI & BUSINESS PROCESS AUTOMATION

CRM and Automation Specialist with a software engineering background and experience designing connected sales and operational workflows. Skilled in Zoho CRM, Zoho Flow, Make.com/Zapier, Gallabox, AI calling integrations, REST APIs, webhooks, Laravel, Java, Spring Boot, and Flutter. Applies established CRM practices across the lead lifecycle: reliable capture, clear ownership, timely follow-up, accurate pipeline data, and reporting that helps managers act. Experienced in connecting sales, operations, and finance systems to reduce manual handoffs and give teams a consistent view of the customer. Combines technical delivery with process design to build solutions that are practical for staff and scalable for the business.

PROFESSIONAL EXPERIENCE

360Medicare Consultancy LLC — Dubai, UAE

November 2025 - Present

Backend and CRM Automation Specialist

- Design CRM and automation workflows that help sales teams respond to new leads promptly, maintain consistent follow-up, and reduce manual coordination.
- Connect Meta lead campaigns to Zoho CRM through (Make.com/Zapier/Zoho LeadChain), bringing campaign enquiries into a structured lead assignment and tracking process.
- Integrate TidyHire AI calling outcomes with lead records so teams can review call results, customer intent, and engagement before their next action.
- Build workflows across Zoho CRM, Flow, Creator, and Books to connect sales activity with operational processes and finance handoffs.
- Map business processes and implement lead routing, reminders, approvals, notifications, and document flows that give each stage a clear owner.
- Develop responsive web solutions and contribute to a unified internal platform that brings business processes, data, and management visibility together.
- Explore MCP and agentic AI approaches for connecting business data with dashboards and actionable recommendations, using platforms such as Salesforce Agentforce as research references.

Erick Trading LLC – Sharjah, UAE

April 2025 - October 2025

Software Engineer

- Developed and maintained POS, billing, booking, and customer management features using Laravel, MySQL, and RESTful APIs.
- Built responsive web experiences with Next.js and cross-platform mobile features with Flutter, applying MVVM architecture to organize application logic.
- Connected business workflows with Stripe payments, Firebase notifications, and API integrations, while customizing WordPress and Wix websites for marketing and customer engagement.
- Provided IT support across departments and worked with design, operations, and support teams to make software fit staff workflows and customer needs.

Diviso SoftTech – India

June 2022 - July 2024

Software Engineer

- Developed backend features and integrations using Java, Spring Boot, microservices, REST APIs, and databases, supporting reliable communication between product systems.
- Built Flutter features connected to backend APIs, gaining experience across the product from server-side logic to the mobile customer experience.
- Worked with senior engineers and cross-functional teams to resolve bugs, improve performance, and maintain code through sprint planning, stand-ups, and code reviews.

KEY PROJECTS

1. Lead Engagement & CRM Automation

- Role: CRM Automation & Integration
- Tech Stack: Zoho CRM, Zoho Flow, Make.com, Meta Lead Ads, TidyHire AI Calling, Gallabox, REST APIs, webhooks
- Contribution: Connected campaign leads, AI calling outcomes, assignment, and follow-up workflows so sales teams can review customer intent and take the next action from a shared CRM record.

2. Unified Business Operations Platform

- Role: Product Design & Full-Stack Development
 - Tech Stack: Next.js, TypeScript, Prisma, PostgreSQL, REST APIs
 - Contribution: Built a test-stage internal platform bringing CRM and operational workflows into one application, with processes for team coordination, requests, and approvals. Exploring MCP and AI-agent approaches for future data access and decision support.
-

TECHNICAL & BUSINESS SKILLS

- CRM & business systems: Zoho CRM, Flow, Creator, Books, Analytics, Recruit; lead management, pipeline workflows, reporting, and process design
 - Automation & customer engagement: Make.com, Microsoft Power Automate, Zapier, Gallabox, Meta Lead Ads, WhatsApp workflows, TidyHire AI calling
 - Integrations: REST APIs, webhooks, CRM integrations, data flows, and cross-system automation
 - Software development: Laravel, Java, Spring Boot, Next.js, TypeScript, JavaScript, Flutter
 - Data & development tools: MySQL, PostgreSQL, Git, Postman, Docker
 - Web platforms: WordPress, Wix, responsive web development
 - AI: AI-assisted customer workflows and AI agents; exploring Model Context Protocol (MCP) for business system integration
-

EDUCATION

Bachelor of Computer Science
University Of Calicut, India

May 2017 - May 2020

CERTIFICATIONS

Microsoft Power Automate
LinkedIn Learning

Oracle Cloud AI Professional
Oracle University

GIT Advanced
Udemy, Inc.

KEY ACHIEVEMENTS

- Successfully contributed to open-source projects, including creating reusable modules in Spring Boot and Flutter, which were adopted by other developers.
 - Mentored junior developers and interns on full stack development best practices, leading to the successful delivery of complex projects within tight deadlines.
-
